

Generic informations for the decal sheets

All decals are of water-slide type, printed with water-resistant inks and primed with a transparent coating for added durability.

Whenever possible, vector graphics is used for the drawings and full CMYK+W print process employed, to ensure the best possible resolution. Metallic colours are separate inks, more expensive than the usual ones and requiring an additional print step. Therefore, decals with metallic colours are usually more expensive.

The decal price is driven almost exclusively by (a) the sheet size and (b) the amount of inks required to print it. It depends very little from the actual motif being printed.

The standard sheet is a rectangular strip of 210mm x 40mm, slightly larger in surface than an A7 sheet (i.e. 1/8 of a standard A4 page).

Sheet type	Price (in EUR, VAT excluded)
1x A7 decals sheet, 3 colours + white + black + 2 metallics	19,50 EUR
1x A7 decals sheet, 3 colours + white + black + 1 metallic	16,50 EUR
1x A7 decals sheet, up to 3 colours + white and/or black	14,20 EUR
1x A7 decals sheet, black & white	9,00 EUR
1x A7 decals sheet, monochrome (only metallic)	9,00 EUR
1x A7 decals sheet, monochrome (only white or black)	6,20 EUR

Prices are valid as of January 2020.

In order to compute the price of a bespoke decal sheet, please note that in the above table "colour" means "printer ribbon colour". Therefore, a decal containing for instance a "red only" motif, it actually means "yellow+magenta+white underneath", i.e. three colours.

G.N.S.R. available decal sheets

All decals in this page are in 1:76 scale, thus suitable for OO/OO applications. The same items are also available in the following scales:

- 1:152 / British N
- 1:87 / HO / H0
- 1:64 / S
- 1:43.5 / O / 0

and upon request in any other scale. It is worth mentioning that the size of the sheet remains constant, therefore a change in scale will correspond to a change in the quantity of artwork present on the sheet. Special requests (unconventional sizes or quantities) will be considered on a case-by-case basis.

Please note that the yellow colour is used to indicate both the real yellow and the gold inks. The relevant description specifies it for the corresponding decal sheet.

Prices are in Euros, VAT excluded.

Markings for steam locomotives: numbers and company brand

The set is available in two sizes, both suitable for 1:76:

- Font size 3mm
- Font size 2.3mm

The available styles are:

- Shaded
- Unshaded

the difference being the presence or absence of the cast black shadow on the bottom left of each character. For scales up to 1:76, the sheets are available in any of the four possible combinations or mixed (see example here below). For scales bigger than 1:76, the standard sheets are always composed with a single style.

Price 16,50 EUR per sheet
